

Why worry about oxidative stress caused by **free radical damage**?

- It is linked to over 200 diseases!
- It is the main biochemical marker of aging itself!

Protandim™ fights free radicals a million times more powerfully and effectively than your **average antioxidant!**

Antioxidant molecules from supplements, foods, and juices can only defeat free radicals on a **one-to-one basis** (one antioxidant molecule can neutralize only one free-radical molecule).

But Protandim accomplishes the job of eliminating free-radicals in a much more powerful and effective way by empowering your body to produce its own free-radical-fighting enzymes that get the job done by **defeating one million free radicals per second, every second!** *

*peer-reviewed clinical studies can be viewed at www.pubmed.gov, search "Protandim"

**MAKE THE WISEST CHOICE FOR ANTIOXIDANT PROTECTION
BY COMPARING THESE RATES OF FREE RADICAL ELIMINATION:**

Antioxidants from dietary sources- Foods and Supplements

1:1 then done

Each antioxidant molecule from dietary sources can eliminate just one free radical. It is not possible to consume enough to measurably lower oxidative stress levels.

87 glasses of red wine

375 oranges

11 pounds of blueberries

120 vitamin C tablets

The body produces **millions and millions of free radicals daily!** It's not possible to fight those numbers with dietary sources unless you could consume enormous amounts of antioxidants as listed above.

VS

Your body's own antioxidant enzymes- Protandim

1:1,000,000 per second!

Each of your body's enzymes eliminates free radicals in every cell of your body at a rate of 1 million free radicals per second, 24 hours a day for the life cycle of the enzyme.

Just take one Protandim tablet daily!

Each antioxidant enzyme produced by Protandim can defeat one million free radicals per second, 24/7.

- **No other antioxidant supplement can match Protandim's antioxidant power!**
- **Protandim also reduces inflammation!**
- **Protandim activates Nrf2 to communicate with your DNA to deliver a biochemical wake-up call to your genes.**
